

# PLATINUM

The UK's No1 Selling Brand

## Batteries

Industry Solutions...

[www.largoplantservices.co.uk](http://www.largoplantservices.co.uk)

## Platinum Xtreme

The Platinum Xtreme range offers premium power and performance for a wide range of commercial vehicle applications. Whether it is a heavy goods vehicle, truck, agricultural equipment or even construction vehicles, Platinum Xtreme offers reliability across all applications.

## Platinum Xtreme Plus

The Platinum Xtreme Plus range is designed to exceed O.E specification and offers superior performance with +30% Extra Power, increased service life and V2+ (vibration resistance).

## Platinum Xtreme Plus Sealed

The Platinum Xtreme Plus Sealed range is an extension of the Xtreme Plus range. Designed to exceed O.E specification, this fully sealed battery is the perfect solution for vehicles that demand premium power, performance, reliability & added safety.

## Features & Benefits

- ✔ Exceeds OE Specification - Original Quality Spare Part Built To Meet And Exceed Manufacturing Standards
- ✔ 2 Year Warranty
- ✔ Superior Reserve Capacity/Ampere Hour Rating\*
- ✔ Maintenance Free, Not Maintenance Impossible
- ✔ Super Heavy Duty Performance
- ✔ Long Life +
- ✔ +30% Extra Power\*
- ✔ Thick Grid Construction - Greater Reserve Capacity & Improved Cycling Performance
- ✔ Interlocking Plates - Specially Designed For Superior Vibration Resistance (V2+)
- ✔ Tail Lift Application - Powers Vehicles With Tail Lift Facilities 3 Increased Hotel Load (In-Cab Electrical Equipment)\*
- ✔ High Cranking Performance In The Coldest Of Climates\*
- ✔ Glass Mat Separators - Improved Cyclic Performance\*

\*Platinum Extreme Plus

# Platinum Battery Technology

### Hydrometer

- At full charge, the electrolyte specific gravity is 1.28 while at 50% of charge considered the minimum serviceable condition, the specific gravity is typically 1.22, in a typical situation. When the specific gravity drops to 1.10. The battery is full discharged.

### Double lid

- Prevent contamination and also add to the strength and rigidity.
- Include permanent flame arrester to prevent accidental explosion from external sparks or flame.
- Have hydrometer built in for faster checking.

Ergonomic easy carry down fold handle

Cold forging terminal – High strength from fine structure and prevent the leakage

### Double lid with labyrinth structure

- Prevent electrolyte losses by collection and returning liquid to the reservoir.
- Vents allow the battery to “breathe” during temperature changes and charging.

### Flame Arrester

- Safety system
  - Prevent the explosion from spark of outside
  - Minimize the acid-leakage
  - Prevent the inflow of dust

### Centered Cast-on Plate Straps

- Stronger than the thinner gas-burned conventional connectors.
- Reduce the lever action movement resulting from road shock.

NST Special Tissue for Positive Plates  
Prevent the active material shedding from frequent charging and discharging.

### Polypropylene Case

- Reinforced design is precisely tailored to support the battery elements.
- Material is exceptionally strong, durable and withstands the shock and vibration from the road.

REG Rolled Expanded High Tin Grid

Creating sub grain boundary which provide longer life span against corrosion.  
Ergonomic easy carry down fold handle

Hot-melting  
Improve the anti-vibration characteristic

### Low-Resistance Envelope Separators

- Encapsulate negative plates
- Improve vibration durability
- Prevent “treeing” and internal shorting between positive and negative plates.

Diamond Mesh – increase the conductivity  
Central lug – increase the electricity collection characteristic  
High density active material with special additives – high starting performance

### Wrought lead-Calcium Grids

- Offer considerable strength
- Resistant to grid corrosion
- Over-charge resistant
- Minimal gassing and water usage
- Less self-discharge
- Resist thermal runaway

Diamond Mesh
